# T: What happens during the water cycle?

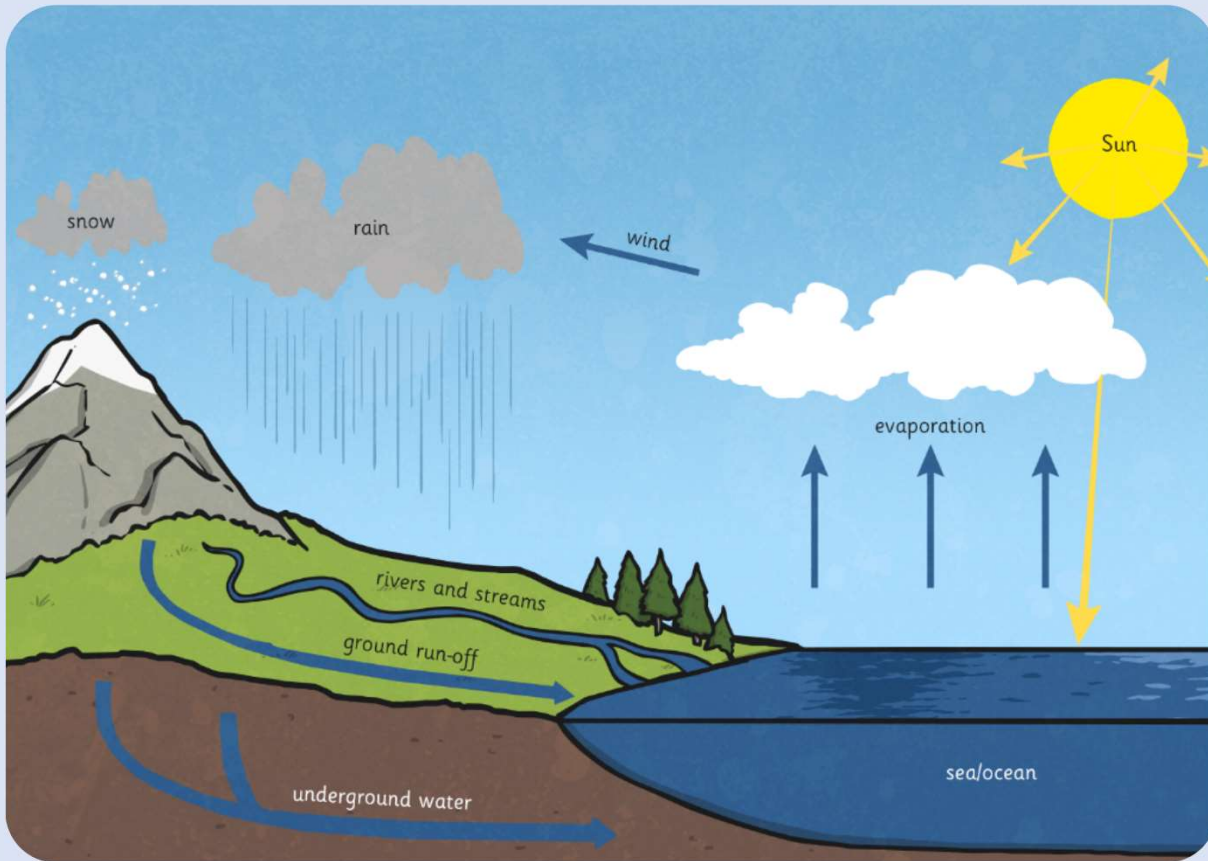

# Raindrops

- Lets say I'm a raindrop.
- You've fallen 2km to the ground, falling at speeds of up to 40mph!
- Where do you land?
- What do you see?
- What happens next?

# The Water Cycle

Can you see your  
raindrop's  
journey through  
the water cycle?

It's a cycle - the  
same water  
keeps going  
around and  
around...

# Log onto Purple Mash and look at your '2Dos'.

Complete the activities set on the Water Cycle!

Challenge - Can you draw and describe each part of the cycle?

Remember you can send work to [Year6@sfxcps.co.uk](mailto:Year6@sfxcps.co.uk) to show your fantastic home learning!
